

The regulations for drilling companies will improve water quality by ensuring boreholes are not too close to sources of contamination. The SI will, furthermore, improve the quality of the boreholes to be drilled, thereby reducing the instance of defective or collapsed boreholes. Professional drilling companies will now be able to offer competitive prices on the ground of common quality standards, what will improve trust within the population

Since surface and groundwater are interlinked, groundwater management and protection is a fundamental aspect of sustainably managing the water resources of the nation.

Documents and Information to submit to WARMA:

No.	Parameter	Class A	Class B	Class C
1	PACRA-Shareholding			
2	Proof of updated EIZ Registration Company			
3	Proof of Hydrogeologist/Geologist EIZ updated practicing License	4 Drilling Supervisors 4 Drillers 2 Hydrogeologist / Geologist	1 Drilling Supervisors 2 Drillers 1 Hydrogeologist / Geologist	1 Drilling Supervisors 1 Driller Hydrogeologist / Geologist
4	Credentials of Drillers Supervisor			
5	Credentials of Drillers			
6	Rigs	4 Rigs	2 Rigs	1 Rig
7	Cargo Trucks	4 Cargo Trucks	2 Cargo Trucks	1 Cargo Truck
